

(Unclassified // FOUO)

CSWC Operational Period Summary

1800 June 01 2018 to 0600 June 02 2018

Crews from Sacramento Fire began conducting fuel reductions at Sacramento Regional Parks on 06/01/18. Removing the fuel limits the possibility of wildfires later in the season. Fuel reductions will continue through 06/15/18.

Water Shut Off - Emergency Repair, City of Avalon (Santa Catalina Island), Los Angeles County (FINAL)

On 06/01/18 at 1436 hours, the California State Warning Center (CSWC) received report from the Cal OES Southern Region Duty Officer (SDO) that a break in a sewer line located at the Pebbly Beach Lift Station occurred at approximately 1200 hours in the City of Avalon, Los Angeles County. As part of emergency repair, the water and sewer system were shut down, affecting all residential and commercial customers in the city.

- The population of the City of Avalon is approximately 4,000.
- Pebbly Beach Rd. is open to essential travel only.
- Portable restrooms are available at the base of the Green Pier, Cabrillo Mole, Casino Dive Park and near Wrigley Stage.
- Pallets of bottled water are available at the base of the Green Pier for the public to use.
- There are no evacuations.
- There are no requests for state assistance.
- The City of Avalon activated their Emergency Operations Center (EOC), Los Angeles County is monitoring.

Per the SDO as of 06/01/18 at 2000 hours:

- The City of Avalon has completed temporary repairs.
- Southern California Edison (SCE) operators are beginning to refill the Avalon water distribution system to re-establish fresh water service.
- The process is expected to last through the night.
- As a precaution, beaches near Avalon Harbor have been closed pending water sample test results.
- SDO will continue to monitor the situation.

Virulent Newcastle Disease (vND) in Chickens, Los Angeles and San Bernardino Counties

The California Department of Food and Agriculture (CDFA) has detected virulent Newcastle Disease (vND) in chickens in Los Angeles and San Bernardino Counties.

- CDFA and the U.S. Department of Agriculture (USDA) have scaled up their response to this incident, as more cases have been detected.
- CDFA confirmed that there are no commercial premises currently involved.
- CDFA confirmed that there is no public health risk due to this virus.
- 2 Spanish language interpreters were located to conduct surveillance (education/outreach), with two more are arriving on 06/04/18.
- The USDA National Incident Management Team (IMT) arrived on 06/01/18 and are teamed up with CDFA personnel at the CDFA Ontario District Office. Each section is being briefed by CDFA personnel.

Activations

- San Bernardino Operational Area (OA) Emergency Operations Center (EOC) is activated to Level 3 (lowest level) and will continue to monitor the incident.

Deployments

- 1 Cal OES Science and Technology Advisor deployed on 05/29/18 until 06/01/18 to the CDFA/USDA ICP as a Biosecurity Infectious Disease Subject Matter Expert with an operational period of 0700-1900 hours.
- 1 Cal OES Southern Region Senior Emergency Services Coordinator (Sr. ESC) deployed to the CDFA/USDA ICP as an AREP with an operational period of 0700-1900 hours.
- 1 Cal OES Logistics Section Chief (Log Chief) deployed to the CDFA/USDA ICP with an operational period of 0700-1900 hours.

Logistics

Per the Cal OES Southern Region AREP on 06/01/18 at 0832 hours:

- Cal OES Southern Region along with Cal OES Logistics continue to assist CDFA in identifying a facility to expand operations in the immediate area of the CDFA district office in Ontario, San Bernardino County.
 - The negotiations continue.
 - 3 facilities will be inspected on 06/02/18, as potential locations.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

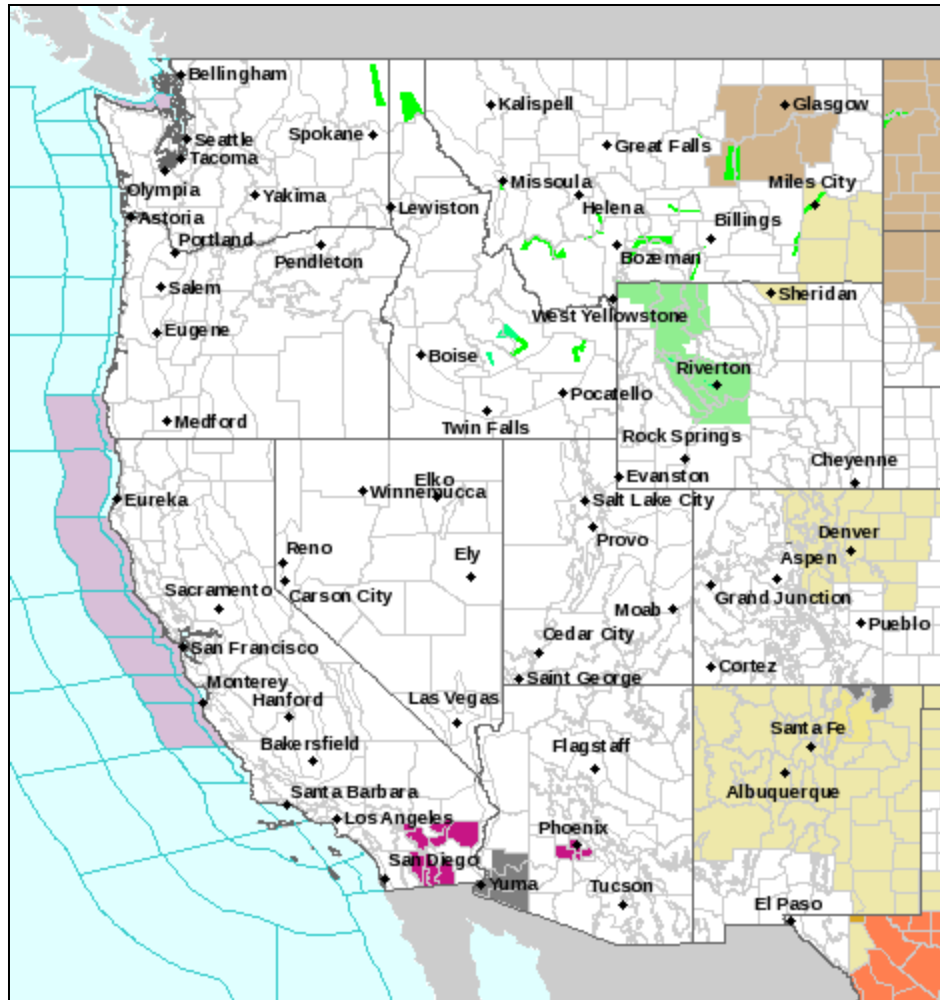

Weak atmospheric ridging will create a warmer and drier pattern today. Temperatures will be 5 to 15 degrees above normal. The ridge will break down tomorrow and Monday due to a Pacific trough passage. Temperatures will cool back to near normal and the trough still appears to be drier, in terms of precipitation potential. W-SW-S winds will increase tomorrow afternoon with gusts up to 30 mph. Some teen humidity values will be possible across the Sacramento Valley and east slopes of the Cascade and Sierra ranges tomorrow afternoon and moderate some on Monday. A series of weaker Pacific waves is expected to impact Northern California most of next week although precipitation appears to be lacking at this time. Either way, the atmosphere should remain well mixed and temperatures should be near to a little above normal. This type of weather pattern is tough for the models so some changes are likely as we get closer to the period.

SOUTHERN CALIFORNIA

Very warm and dry this weekend

A ridge of high pressure will build into California from the Pacific Ocean bringing a significant warming and drying trend to the region through tomorrow. Temperatures will be around 10 degrees above normal by tomorrow, which will cause the warmest valley locations to reach 100 degrees. Minimum humidity will drop mainly into the teens this weekend. Winds will be light through this weekend. The ridge will weaken bringing a few degrees of cooling to the area Monday. A weak Pacific trough will form off the West Coast bringing near normal temperatures to the area Tuesday through the end of next week. Minimum humidity will increase into the 15% to 30% range away from the deserts Tuesday through the end of next week. There will be westerly afternoon and evening winds of 15 to 25 mph with gusts to 40 mph across the desert passes Monday through the end of next week. The marine layer will be fairly shallow through the end of next week. Morning low clouds and fog will make only make it over the coastal areas through Monday and then they will make it into the coastal valleys Tuesday through the end of next week. No shower or thunderstorm activity is expected across the region through the end of next week.
